T. Hurt Construction, Inc.

The homeowner's wish to simply finish the lower level of their home grew into a desire to create a luxurious living and socializing area for family and friends.

Careful spatial considerations were given to the layout of the unfinished basement. With the help of T. Hurt Construction, Inc., the homeowners were able to maximize the lower level's square footage, resulting in a TV/media center, pool table area, bar area, exercise room, and bath.

Richly textured materials and finishes create a warm, relaxing environment. Unique tile applications and a one-of-a-kind wall mural reflect the personal style of the homeowners, ultimately creating an enjoyable, finished lower level space.
